Contents

Public Narrative Brief: Forest and Land Fires 2026

01 Scale of the 2026 Season 4–6

02 Peatland and Oil Palm 7–9

03 Law Enforcement 10–12

04 National Strength 13–14

05 International Assistance and Sovereignty 15–26

Firespots in 2026 reach 1.7 times 2019; Indonesia has deployed 53,828 personnel and 64 aircraft

SEASON SCALE

812,271
firespots this year

32.4%
in Central Kalimantan

32.6%
in peatland areas

NATIONAL STRENGTH

53,828
firefighting personnel

2,441
water bombing sorties

Key message

The Government of Indonesia leads the 2026 response to forest and land fires and concentrates it on peatland areas. Individuals and corporations that deliberately burn land are pursued; foreign assistance is coordinated under government command.

- *Firespots* in 2026 reach **1.7** times 2019 and **76%** of 2015.
- One third of the points lie in peatland areas; dry peat makes fires hard to extinguish, so the response is concentrated on peatland.
- Bareskrim Polri has named **20** corporations and **245** individuals as suspects in 2026 forest and land fire cases.
- The response is a joint effort: **31,928** personnel from government units (TNI, Polri, BPBD, local government, Manggala Agni, Forest Police) and **21,900** from community groups (company crews, volunteers, Fire Care Community).

MESSAGES FOR THE PUBLIC

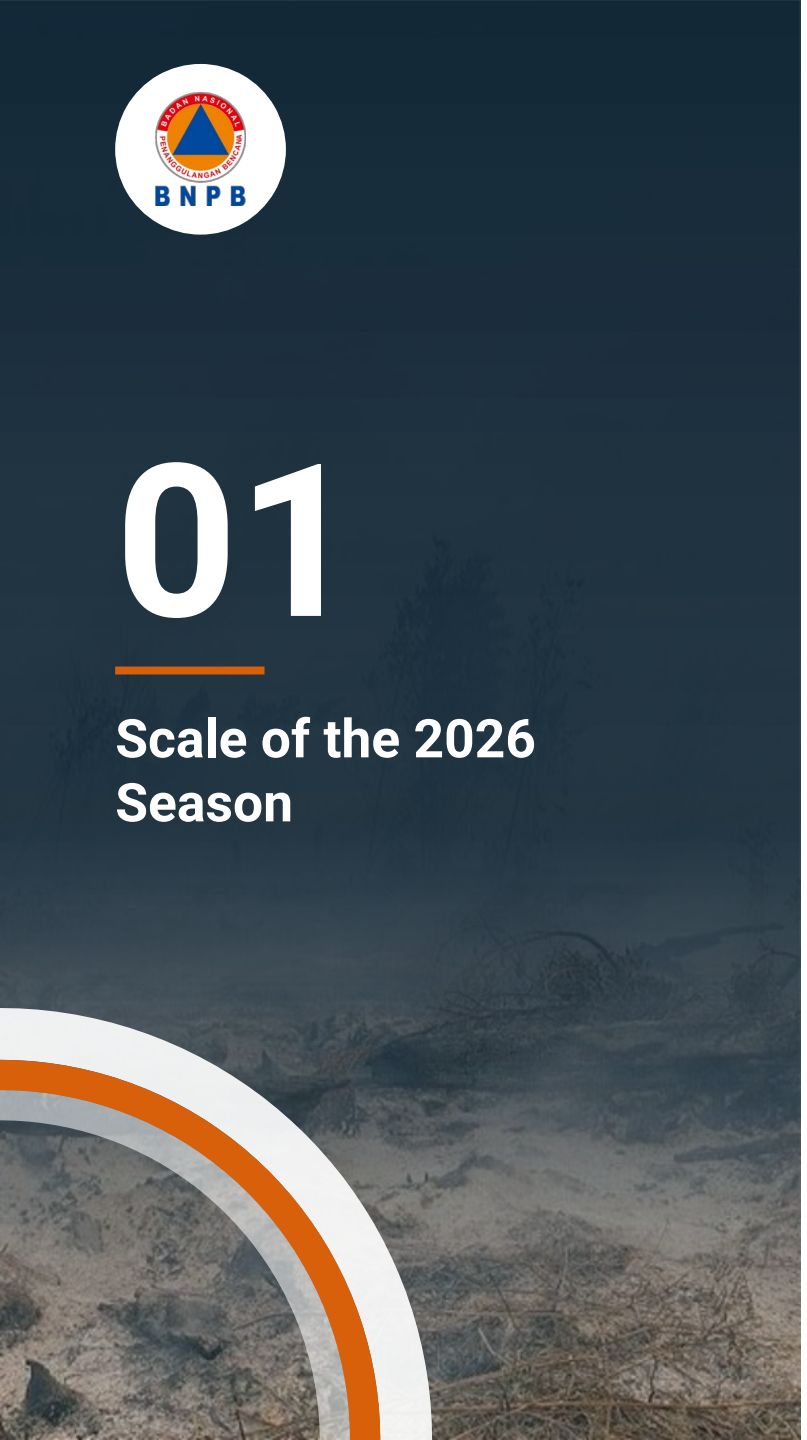

Scale of the 2026 season
The 2026 season is the most severe since 2019 and is handled under national command.

Focus on peatland areas
Prevention and response are concentrated on dry peatland areas.

Single-channel assistance
Foreign assistance enters through one BNPB channel under Indonesian government command.

Peatland and Oil Palm

01 Scale of the 2026 Season 4–6

02 Peatland and Oil Palm 7–9

03 Law Enforcement 10–12

04 National Strength 13–14

05 International Assistance and Sovereignty 15–26

Forest and land fire area surges in a long dry year (El Nino)

BNPB

LOSSES

about 15
billion US dollars, projected 2026 losses

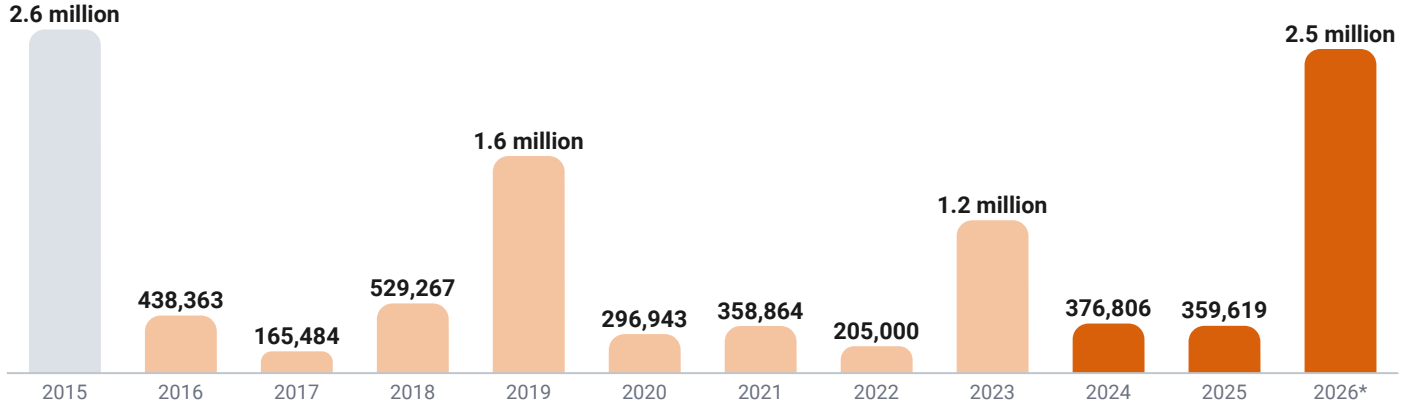

PEATLAND

32.6%
of 2026 *hotspots* in peatland areas

439,785
hotspots in peatland areas

Official national burned area

Burned area, ha per year, 2015–2026

Peatland

- Peat embers spread beneath the surface, so fires are hard to put out from above.
- Peatland is considered degraded when its water table drops more than **40** cm below the surface; at that point peat is dry and burns easily.
- The number of forest and land fire incidents rises sharply when average rainfall during the dry season is below **4 mm/day**.
- The 2015 losses were about US$**6,165** per ha, with losses of US$**16.1** billion (World Bank); this figure is the basis of the 2026 projection.

POINTS CONVEYED

Dry peat
Peat left to dry out burns easily; the fire spreads beneath the surface and the smoke travels far.

Area in 2026
The 2026 bar is a satellite-based projection to 3 November; the official area follows once the season ends.

Peatland areas
Indonesia has **865** peatland areas covering **24.7 million ha**.

In the October peak week, 26.2% of *hotspots* were inside concessions; most in industrial timber, then oil palm

INSIDE CONCESSIONS

48,035
hotspots in concession areas

20
corporate suspects

23
corporations proposed for licence revocation

Hotspots in concession areas by licence type

Hotspots, peak week of October

Narrative

- Licence holders must prevent and extinguish fires in their areas.
- *Hotspots* in concession areas are the basis for investigation by Forestry law enforcement and Bareskrim Polri.
- Industrial timber plantations account for the most concession *hotspots*; oil palm plantations come second.
- Oil palm is a strategic commodity; action is taken against individuals who burn, especially on peatland.

SUPPORTING FACTS

Water table for everyone
The duty to maintain peatland water levels applies to all land managers.

Licences revoked
The Ministry of Forestry has revoked **5** licences of companies whose areas burned.

Foreign capital
4 suspect corporations have foreign capital and face the same law as domestic ones.

Source: *Processed by BNPB from NASA FIRMS VIIRS and the concession map (GFW, Trase), 6–12 Oct*

03

Law Enforcement

01 Scale of the 2026 Season 4–6

02 Peatland and Oil Palm 7–9

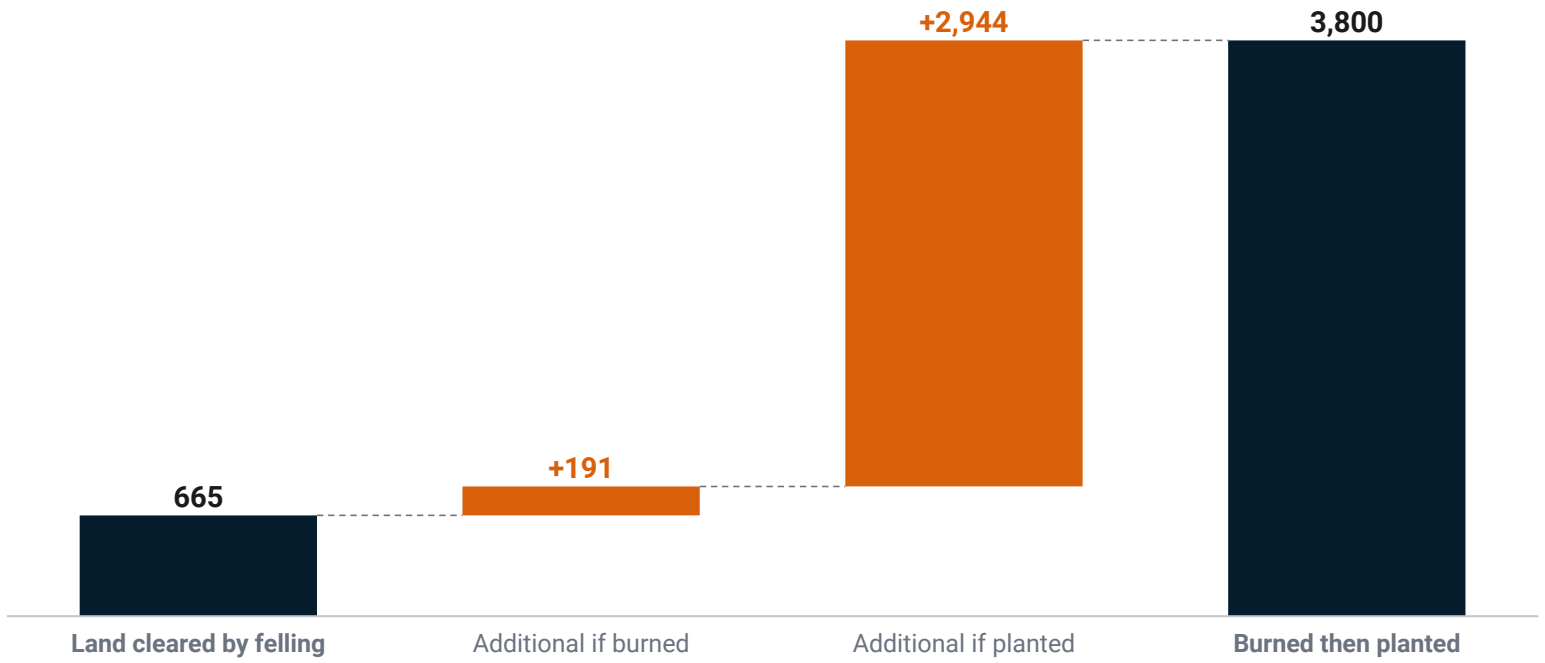

03 Law Enforcement 10–12

04 National Strength 13–14

05 International Assistance and Sovereignty 15–26

Data show that land burned and then planted sells for US$3,800 per ha, 5.7 times land cleared by felling only

Land sale price, US$ per ha

2026 law enforcement

STAGE	TOTAL
Individual suspects (people)	245
Administrative sanctions (legal entities)	26
Proposed for licence revocation (corporations)	23
Corporate suspects (corporations)	20
Licences already revoked (licences)	5

- Bareskrim Polri proposes licence revocation to the licensing ministries.
- The Ministry of Forestry freezes other licences and requires land restoration.
- Burners are prosecuted as individuals; their financiers are charged as corporations.
- Companies that helped extinguish fires are still charged if their land is proven to have been burned.
- Law enforcement removes the economic gain from burning land.

LEGAL ACTION

Burners
Individual criminal charges for those paid to set fires.

Financiers
Corporations that fund burning are pursued whoever owns them.

Land
Land that is deliberately burned may not become a new plantation; the licence is revoked.

Source: *Purnomo et al. 2017; Bareskrim Polri 29 Oct; Kemenhut law enforcement 18 Oct*

© 2026 Badan Nasional Penanggulangan Bencana

Responsibility for the fires extends beyond Indonesia: 83 of 103 companies with *hotspots* in their concessions belong to groups with foreign shareholders

FOREIGN AFFILIATION

65
Singapore-group companies

18
Malaysia-group companies

4
foreign corporations named suspects

Foreign business groups with the most *hotspots* in their areas

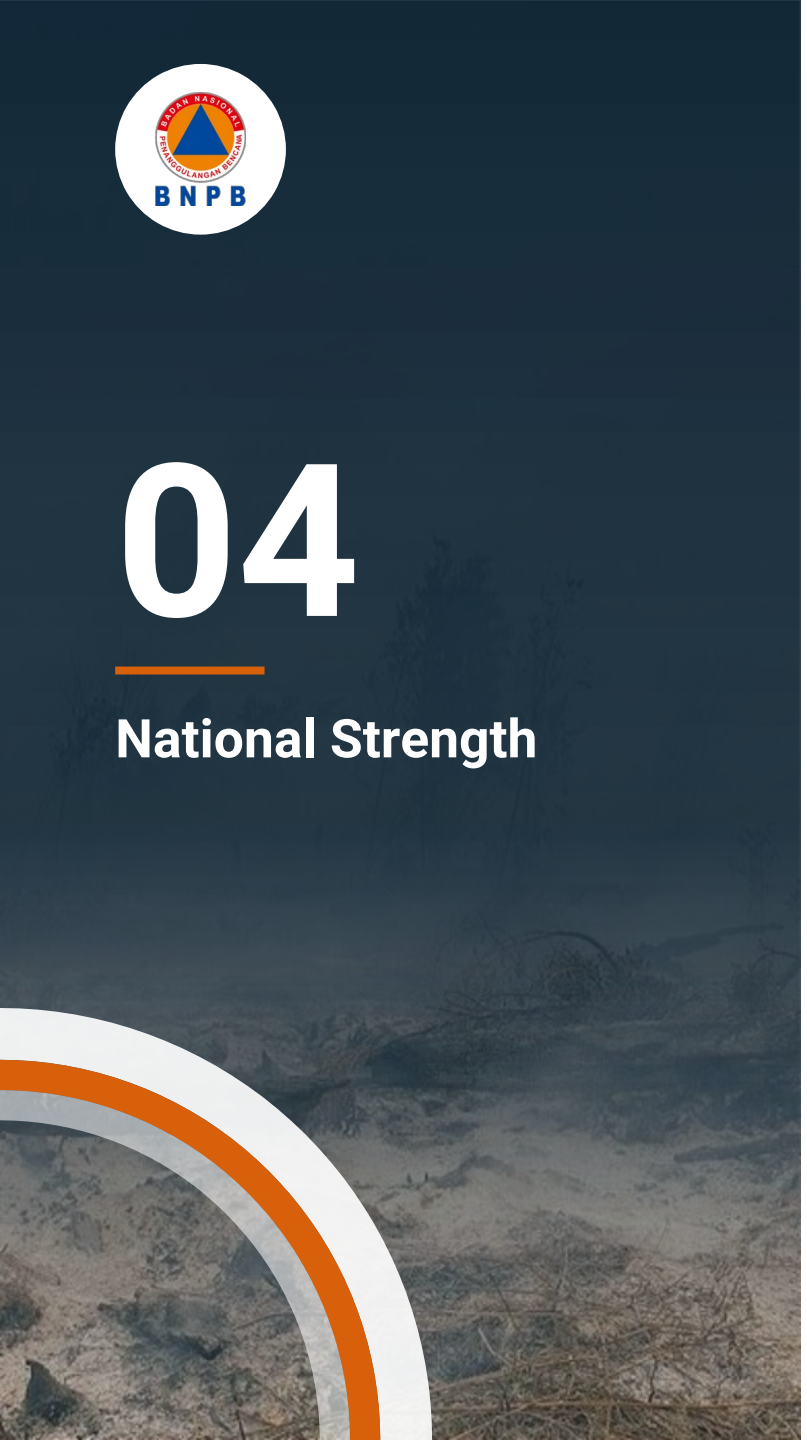

BUSINESS GROUP	COUNTRY OF ORIGIN	COMPANIES	*HOTSPOTS*
Sinar Mas	Singapore	25	9,264
RGE/APRIL	Singapore	6	3,599
Wilmar	Singapore	21	1,388
Premier Palmoil Energy Pte Ltd	Singapore	1	339
Musim Mas	Singapore	4	152
Sime Darby	Malaysia	7	129
Sampoerna Agro/POSCO	Singapore, South Korea	1	68
First Resources	Singapore	2	63
8 other groups	Singapore, Malaysia	16	48
Total		**83**	**15,050**

Narrative

- Most companies in *hotspot* areas are affiliated with Singapore and Malaysia business groups.
- The same legal treatment applies to companies with foreign capital and to companies with domestic capital.
- *Hotspots* in licensed areas indicate locations; perpetrators are determined through investigation.

Foreign assistance needs careful handling to avoid gaps that could affect Indonesia's sovereignty

BNPB

Gaps that could be exploited and how to close them

	WHAT OTHER COUNTRIES CAN MAP	HOW THE GOVERNMENT CLOSES THE GAPS
Response	How quickly Indonesia moves when a major disaster occurs	Command stays with BNPB; foreign teams only assist
Territory	*Hotspot* distribution and logistics routes in vulnerable areas	Every flight by another country requires a permit and follows its assigned task
Concessions	Concession areas and oversight in border regions	Foreign teams enter only the assigned site and are always accompanied by officials
Data	Strength of data centres and the national logistics chain	Imagery and operational data are handed to the government and processed domestically
Opinion	Extent of public concern over smoke	The government speaks with one voice, with open official data
Funding	Foreign fund flows to domestic institutions	Foreign institutions and funds must register and coordinate with BNPB

Overseas partnership: assistance is welcomed with appreciation, and operational sovereignty comes first

BNPB

Basic principles and key sentences

Basic principles

- Humanitarian assistance from abroad is welcomed with appreciation and handled with care.
- Assistance operations can be used to gauge response capacity and map territory.
- National interest and operational sovereignty are the first priority.
- Partnerships with friendly countries continue on an equal footing.

Key sentences

- We are open to partnerships that are equal and mutually respectful.
- Operational sovereignty rests with BNPB in accordance with Indonesian law.
- This is a mandate of the law and is not negotiable.
- All assistance works under the command of the Government of Indonesia.

Limits that must not be crossed when accepting foreign assistance

What cannot be permitted

	NOT PERMITTED	PROVISIONS
Flights	Aircraft of other countries fly freely to map territory	Flight plans must be approved by BNPB and the Air Force
Data	Real-time *hotspot* data and concession maps handed to outside parties	TNI strength data and public sentiment stay within the country
Bases	Own base camp or warehouse outside BNPB posts	All teams work from the BNPB command post
Conditions	Assistance conditional on access to new mines or concessions	Assistance accepted without political or economic conditions
Funding	Assistance funds managed directly by foreign NGOs	Funds managed through government mechanisms
Sensors	Drones or thermal and LIDAR sensors without permission	Only with permits and official escort
Agreements	Verbal commitments or signatures during an audience	Written, reviewed at least seven days by Foreign and Defence Ministries
Interviews	Interviews with victims without an escort	Accompanied by official authorities or BNPB
Military	Armed teams or projects in sensitive areas	Approval of President and TNI HQ; Papua, South China Sea closed
Access	Permanent assistance hubs or joint bases	Not approved; avoid the image of a weak Indonesia

Humanitarian operations use civil MoUs under BNPB; SOFA and VFA are matters for the central government

Guide to three types of documents

MoU

Memorandum of Understanding: a civil cooperation memorandum, without military immunity.

- Signed by BNPB with partner institutions.
- The mechanism BNPB uses.

SOFA

Status of Forces Agreement: an agreement between states on the legal status of foreign military personnel while in Indonesia.

- Concerns jurisdiction and sovereignty.
- Not signed at BNPB level.

VFA

Visiting Forces Agreement: an agreement on visits by foreign forces for temporary military exercises, similar to a SOFA.

- Decided by the central government through the Foreign and Defence Ministries.
- Not within BNPB's authority.

Key sentences if offered a SOFA

- We greatly appreciate the offer of assistance.
- For humanitarian operations, we use civil mechanisms under BNPB in accordance with the Disaster Management Law.
- Agreements on the status of forces are the authority of the central government through the Foreign and Defence Ministries, and are not decided in a disaster management partnership forum.
- The offer of assistance continues to be processed through BNPB's civil mechanisms.

Australia supports the East Kalimantan operation with 1 Hercules aircraft, 6 sorties a day for 7 days

BNPB

OPERATION PLAN

1	6	7	42
Hercules aircraft	sorties per day	operation days	sorties planned

Australian assistance narrative

Thanks to a friendly nation

- The government appreciates assistance from friendly countries, including Australia.
- This assistance is a good form of bilateral cooperation.

Three-party collaboration

- The operation is run by BNPB together with Australia.
- The East Kalimantan Provincial Government takes part in the operation.

In line with the diplomatic note

- The operation follows the offer in the diplomatic note of the Government of Australia.
- The operation is scheduled for early November.

Supporting government operations

- Australia's presence complements the government operation already under way in East Kalimantan.
- Command remains with BNPB.

OPERATIONAL ARRANGEMENTS

Accompaniment
Crews and aircraft are accompanied by BNPB and TNI personnel throughout the operation.

Flight plan
Every *sortie* uses a flight plan approved by BNPB and the Air Force.

Reporting
Operation results are reported daily to the BNPB command post.

Talking Point: Welcoming Australian Assistance for Forest and Land Fire Response in East Kalimantan (1/3)

Halim Perdanakusuma Air Base, Jakarta

Appreciation and Solidarity

On behalf of the Government and people of Indonesia, I wish to convey our heartfelt appreciation to the Government and people of Australia for the timely and generous offer of assistance in response to the forest and land fires currently affecting our country. This gesture of solidarity speaks volumes about the depth of friendship, mutual trust, and good neighbourliness that has long characterised the relationship between Indonesia and Australia, particularly in times of adversity.

Assistance as Support to an Indonesian-Led Response

We are deeply grateful for this support, and we would like to respectfully underline that assistance from Australia, as well as from other partner countries, is most welcome as a complement to the response operations led and conducted by the Government of the Republic of Indonesia. This approach ensures coherence, accountability, and effectiveness on the ground, while allowing us to make the best possible use of the valuable contributions of our partners.

KEY MESSAGES

Appreciation
Thanks to the government and people of Australia for the prompt offer of assistance.

Indonesian-led
Partner assistance complements operations led by the Government of Indonesia.

Well targeted
Assistance is put to the best use according to field needs.

Source: *Head of BNPB talking points, Nov 2026; Bakom 15 Oct 2026; Setkab 21 Sep 2026*

© 2026 Badan Nasional Penanggulangan Bencana

Talking Point: Welcoming Australian Assistance for Forest and Land Fire Response in East Kalimantan (2/3)

Halim Perdanakusuma Air Base, Jakarta

BNPB as Coordinating Authority within a Single Command System

In accordance with the Law on Disaster Management of 2007, operational coordination for disaster response in Indonesia rests with the National Disaster Management Authority, BNPB. Accordingly, all personnel, aircraft, equipment, and logistics from partner countries will be fully integrated into our national command system, accompanied at all times by BNPB and Indonesian National Armed Forces personnel, and will operate on the basis of flight plans and operational plans approved by BNPB and the Air Force. This arrangement is intended to ensure safety, coordination, and the optimal use of all available resources.

Focused and Complementary Operational Support

We are pleased that Australian assistance will complement our ongoing national efforts, particularly in strengthening aerial water-bombing operations. To date, our helicopters have flown **2,441** water-bombing sorties and released water **81,502** times, supported by **97** weather modification sorties. These contributions will add significant value to our integrated operations, which also include ground firefighting, weather modification, and joint patrols, and will help accelerate our collective progress on the ground.

KEY MESSAGES

Single command
All partner assets enter the national command system under BNPB.

Flight plan
Flights use plans approved by BNPB and the Air Force.

Water bombing
Assistance strengthens the air operations already under way.

Source: *Head of BNPB talking points, Nov 2026; Bakom 15 Oct 2026; Setkab 21 Sep 2026*

© 2026 Badan Nasional Penanggulangan Bencana

Talking Point: Welcoming Australian Assistance for Forest and Land Fire Response in East Kalimantan (3/3)

Halim Perdanakusuma Air Base, Jakarta

Indonesia's National Commitment

I would like to share with Your Excellency the scale of Indonesia's national response. To date, the Government has mobilised **53,828** joint personnel and **64** aircraft across Sumatra, Kalimantan, and Papua, from the Armed Forces and the Police to local governments, private-sector crews, volunteers, and community fire brigades. This mobilisation reflects the full commitment of the Government of Indonesia to addressing this challenge with all available national capacities, and with the strong support of our partners. Around **40.7%** of these personnel come from communities and the private sector, reflecting a truly whole-of-society effort.

Current Situation and Continued Priorities

While air quality in several affected areas has begun to show encouraging signs of improvement, we remain fully vigilant. Weekly fire detections have fallen by **84.9%** from their peak in early October as the rainy season begins. Fire suppression and the prevention of further spread continue to be our foremost priorities. The Government of Indonesia remains firmly committed to managing this situation in a swift, measured, and transparent manner, while placing the safety of our communities and the preservation of our national sovereignty at the centre of all our efforts.

Moving Forward

Over the coming days, the Australian Hercules will fly **6** sorties a day for **7** days in East Kalimantan, working side by side with our national fleet and the Provincial Government of East Kalimantan under a single command. In closing, we express our sincere hope that this cooperation will extend well and deepen our partnership. We are confident that through continued collaboration, we can further strengthen the resilience of both our peoples and the wider region.

KEY MESSAGES

National commitment
The government mobilises all national capacity.

Remaining vigilant
Suppression and preventing the fire from spreading remain the priority.

Continuing partnership
The cooperation is expected to strengthen regional resilience.

Conclusions

Scale

Most severe season since 2019

- *Firespots* in 2026 reach **1.7** times 2019.
- Still below the major fires of 2015.

Trend

Starting to ease

- Latest-week *firespots*, **down 84.9%** from the peak week.
- The rainy season is starting to suppress fires; the trend continues to be monitored.

Response

National command

- **53,828** government and community personnel.
- **64** helicopters and aircraft under a single command.

Aggravating factor

Dry peat

- One third of *hotspots* are in peatland areas.
- Peat that dries out burns easily and is hard to extinguish.

Oil palm

Strategic commodity

- **26.2%** of peak-week *hotspots* are in concession areas.
- Licence holders must prevent and extinguish fires.

Perpetrators

The chain of burners

- **20** corporations and **245** individuals are suspects.
- Burners and their financiers are pursued.

Assistance

Single-channel assistance

- Foreign assistance enters through BNPB coordination.
- Foreign teams work under the command of the Government of Indonesia.

Together

Working together

- **40.7%** of personnel come from community groups.
- Government and community work under one command.
