BNPB welcomes Australia's offer of aerial support and fire expertise to complement Indonesia's national response

Key messages

BNPB recorded 197 firespots across 6 priority provinces on 26 October; Indonesia has deployed 39 helicopters and ±71,878 personnel, and welcomes Australian expertise to complement the response.

Disaster response. BNPB has responded to **2,299 events** in 2026, including the East Nusa Tenggara earthquake, where **27,563 people** are sheltered.

Forest and land fires. 197 firespots recorded by BNPB on 26 October; **6 provinces** have activated emergency status to speed up the response.

National response. 39 helicopters, **±71,878 personnel** on the ground, and **18 sorties** of weather modification; **1,135,000 litres per day** dropped.

Australian offer. 2 Citation, **1** King Air, **1** Bell 412, and fire specialists.

HADR airlift. RAAF C-17A, C-130J, C-27J, and KC-30A fleets number **36 aircraft**; the KC-30A reaches **14,800 km**.

Next steps. Six joint steps, from the specialist offer and asset specifications to research links with BMKG and BRIN.

Indonesia and Australia have worked together on forest fire response since 2015

SUPPORT IN 2015

2
Australian aircraft deployed

OFFER IN 2026

4
aerial assets offered

3
NSW RFS delegation members

Milestones of the partnership

WHEN	MILESTONE	DETAIL
2015	Forest fire support	"Thor" and "Birddog" aircraft
2015	Australian specialists	Aerial firefighting
Ongoing	InaSAFE	With Australia and World Bank
Sep 2026	Diplomatic note	Four aerial assets offered
Sep 2026	Foreign Affairs letter	Offer conveyed to BNPB
Oct 2026	Ministerial Council	Law and Security
Oct 2026	Fire specialist offer	Added to aircraft offer
Oct 2026	Meeting at BNPB	Ambassador and NSW RFS

Australian delegation

NAME	ROLE
H.E. Rod Brazier	Ambassador to Indonesia
Tim Stapleton	Minister Counsellor
Paula	Counsellor
Leigh Pilkington	Team Leader
Bronwyn Dawn Waters	Incident Management Specialist
Rodney Allan Rusden Walker	Incident Management Specialist

PURPOSE OF THE MEETING

Share experience
Incident management and joint firefighting.

Discuss support
Aerial assets and fire specialists for 2026.

Align priorities
Integrated with Indonesia's command system.

Indonesia 2026	National helicopters	Water bombing	Operating	**30**
Indonesia 2026	National aircraft	Patrol and cloud seeding	Operating	**14**

Coordination timeline

DATE	MILESTONE
7 Sep 2026	Embassy diplomatic note
8 Sep 2026	Foreign Affairs letter
14 Oct 2026	Meeting with Minister Burke
22 Oct 2026	Ministerial Council
23 Oct 2026	Fire specialist offer
26 Oct 2026	Meeting at BNPB

- The Bell 412 carries about **4,200 litres** per drop; the national fleet delivers **1,135,000 litres per day**.
- Fire specialists are offered in addition to the aircraft.
- The 2015 deployment provides a proven basis for joint aerial operations.

WHERE AUSTRALIAN CAPABILITY COMPLEMENTS INDONESIA

Aerial monitoring
Citation flights map active fire fronts and complement satellite data.

Situational awareness
Daily fire maps shared with provincial command posts.

Incident management
NSW RFS expertise in joint ground and aerial command.

Potential role

AIRCRAFT	MISSION
C-17A	Heavy equipment
C-130J	Unpaved strips
C-27J	Remote airstrips
KC-30A	Long-range lift

- The KC-30A has a range of **14,800 km**.
- Remote airstrips in Kalimantan and Papua suit tactical airlifters.
- Bases and aviation fuel arranged jointly in advance.
- Indonesian Air Force bases can host airlift for relief logistics.

DEPLOYMENT ARRANGEMENTS

Flight planning
Flight windows planned with BMKG weather information.

Bases
Airfields and water sources agreed before operations.

Fuel and maintenance
Aviation fuel and spare parts arranged jointly.

Experience sharing with NSW RFS covers 8 topics, adapted to Indonesia's geography and disaster management system

NSW RFS

3
incident management specialists

INDONESIAN PARTNERS

2
research and technology agencies

8
exchange topics

Topics and Indonesian counterparts

	TOPIC	FOCUS	COUNTERPART
1	**Incident management**	Incident team structure and roles	Deputy for Emergency Response
2	**Command coordination**	Joint multi-agency command	Deputy for Emergency Response
3	**Fire situational awareness**	Daily maps of active fire	Deputy for Systems and Strategy
4	**Ground and aerial integration**	Helicopters and crews in one plan	Deputy for Emergency Response
5	**Good practice**	Adapted to peat and islands	Deputy for Prevention
6	**Technology and research**	Weather modification and innovation	BMKG and BRIN
7	**Operational safety**	Crew and flight safety	Deputy for Logistics and Equipment
8	**Joint exercises**	Command post and crew drills	Deputy for Prevention

Indonesian context

- Peat fire response in Central Kalimantan covers ±**20,532 ha**.
- Ground crews of ±**71,878 personnel** across six provinces.
- BMKG and BRIN lead research and weather modification for fire response.
- National aircraft deliver **1,135,000 litres per day** in water-bombing operations.
- Weather modification runs **18 sorties** alongside ground and aerial suppression.

WAY FORWARD

Good practice
Adapted to Indonesia's geography and disaster management system.

BMKG and BRIN
Information exchange on research and innovation for fire response.

Technical sessions
Follow-up sessions planned with each counterpart unit.

Six next steps to deliver joint action with Australian partners

STEP	DETAIL	RESPONSIBLE
Confirm the specialist offer 100 days · Planned	Specialists confirmed in addition to the aircraft offer. Numbers and expertise defined together with scope of duties and deployment period.	Deputy for Emergency Response Bureau of Law, Organisation and Cooperation
Confirm asset specifications 100 days · Planned	Specifications and readiness of each aircraft and helicopter confirmed with the Australian side. Technical and logistics requirements confirmed per asset.	Deputy for Logistics and Equipment Deputy for Emergency Response
Agree the operating arrangement 100 days · Planned	Mobilisation and basing agreed with Indonesian authorities, who lead command. Fuel and maintenance arranged under agreed safety procedures.	Ministry of State Secretariat Deputy for Emergency Response
Assess operational needs jointly 100 days · Planned	Needs assessed with technical and operations units to choose the most suitable form of support and enable joint operations from day one.	Deputy for Systems and Strategy · BMKG BRIN
Share incident management experience 2026–2027 · Planned	Technical sessions with NSW RFS on incident command and on integrating ground and aerial firefighting, adapted to Indonesian geography.	Deputy for Emergency Response Deputy for Prevention
Link research and technology 2026–2027 · Planned	Information exchange between Indonesian research agencies and Australian partners on weather modification and fire research.	BMKG · BRIN

EXPECTED OUTCOME

Continuity
Australian support since 2015 underpins the 2026 cooperation.

Shared experience
Practical exchange with NSW RFS on incident management.

Stronger partnership
Concrete follow-up strengthens joint forest fire response.

Thank you

National Disaster Management Agency (BNPB)
